EDUCATION

Degree	University	Years
M.A. in Mathematics, Economics and Statistics	African School of Economics (ASE)	2022 - 2024
Bsc. in Statistics and Computer Science	African School of Economics (ASE)	2019 - 2022

POSITIONS AND FUNCTIONS

Date	Position / Functions	Institutions
Since Jul. 2025	Research Analyst • Under the direct supervision of DEL's General Director, contributes to the full cycle of applied research and evaluation projects for international donors and partners (Center for Civilians in Conflict, National Statistics Bureau of Bhutan, Paris School of Economics, London Business School, Princeton University, etc.). • Analytical studies and data analysis: conducts descriptive and econometric analyses (logit / OLS regressions, Oaxaca-Blinder decompositions, sub-group analyses) on administrative and survey datasets of more than 75,000 observations. • Data collection and data management: programming of questionnaires (XLSForm, SurveyCTO, Survey Solutions, KoboCollect), high-frequency checks (HFC), back-checks, append and cleaning of multi-country datasets. • Dashboards and visualizations: development of dynamic dashboards in R Shiny and Excel for real-time monitoring of field agents (up to 30 agents and 3,600+ questionnaires). • Report writing and analytical notes; contribution to the drafting of technical and methodological proposals for DEL's business development. • Production of training materials (Stata, Python), enumerator manuals and visual materials (badges, presentations) for workshops and field collections. • Contractual and administrative support: drafting of contracts,	Development Expertise Lab (DEL)

Date s	Position / Function	Institution
	attestations and other administrative documents required for project implementation. Selected projects: Diagnostic study on the Nutritional Supplementation Program (PSN) and Malaria Vaccination (RTS,S) in Benin, for Princeton University (since May 2026; Research Analyst / Coordinator). • Coordination of the study from inception, including contribution to the study design and guidelines. • Programming of the questionnaires (XLSForm, SurveyCTO), high-frequency checks (HFC), back-checks and data cleaning. • Collection of qualitative data in health centers and households, and drafting of the corresponding analytical note. • Field supervision of enumerators for the quantitative data collection across the 15 selected communes. • Coordination of the operational logistics of the study. Impact study on students' attitudes and opinions regarding the use of artificial intelligence (research project based on LLMs), for Paris School of Economics, London Business School and RAMD Fund (since Mar. 2026; Research Analyst / Coordinator). • Three-phase impact study in Benin (baseline – implementation – endline). Inception meeting and contribution to the study guidelines. Support to the drafting of the technical and methodological proposal and to the development of the enumerator manual. • Baseline phase (completed): programming of the baseline questionnaire in XLSForm, deployment on SurveyCTO, high-frequency checks (HFC), data cleaning and back-checks. Development of a dynamic real-time R Shiny dashboard for the monitoring of 30 data collection agents who administered more than 3,600 questionnaires. • Implementation phase (completed): operational management of participants' use of the AskBenin and AskVera LLM-based AI chatbots to research political news, course-related topics and personal queries; administration and tracking of quizzes designed to assess participants' political knowledge. • Endline phase (Ongoing): preparation of the endline survey instruments and data collection workflows, Phone Survey. • Full coordination of the operational logistics of the study in Benin: preparation and submission of the statistical visa file to INStAD and participation in the defense of the file; recruitment, training and supervision of enumerators; management of payments to data collection agents and crediting of mobile money accounts; design of the project badges in Microsoft Publisher. Support for Community Protection Mechanisms and Civilian Resilience in the Benin-Togo Border Areas to Improve Civilian Protection (SMCP-BT), for the Center for Civilians in Conflict (CIVIC-PSOP) (Nov. 2025 – Feb. 2026; Research Analyst / Report Co-author). • Inception meeting and contribution to the study guidelines. • Programming of questionnaires in XLSForm. • Data management and cleaning of data collected in Benin (Matéri,	

Date s	Position / Function	Institutio n
	Gouandé) and Togo (Kpendjal 1): HFC, back-checks and post-collection cleaning. • Appending of the combined Benin-Togo data and transmission for analysis. • Contribution to the drafting of the analytical report (forthcoming) and to the preparation of PowerPoint presentations. Gender Inequalities in Bhutan using Civil Registration and Vital Statistics (CRVS-Bhutan), for the National Statistics Bureau of Bhutan and the Ministry of Health of Bhutan (Aug. 2025 – Jan. 2026; Research Analyst / Report Co-author). • Study on gender gaps in the registration of births and deaths in Bhutan, conducted with the National Statistics Bureau and the Ministry of Health. • Conduct analyses on CRVS microdata (75,659 observations) and MICS / NBS data (26,314 observations), with a focus on gender inequalities, infant mortality and under-five mortality. Estimation in Stata of logit regressions (probability of late registration) and OLS regressions (number of days between the event and the registration), and application of the Oaxaca-Blinder decomposition to quantify the contribution of the child's sex to the observed gaps. Production of tables and figures for the report (Stata and Jupyter Notebook / Python). • Contribution to the drafting of the analytical report (forthcoming) and to the related presentations. Nightlight Peacekeeping Project, DEL internal research project (Aug. – Nov. 2025). • Download and processing, in Python, of nighttime light satellite data for Sierra Leone, Côte d'Ivoire and Liberia. • Production of cartographic visualizations and time series for the three countries. Afrobarometer Mali, DEL internal research project (Aug. 2025). Cleaning and Append of the Afrobarometer Mali waves and harmonization of the outcomes for comparative analysis; final dataset of 13,051 observations prepared for analysis.	

Nov. 2024 – Jun. 2025	Research Assistant • Onboarding, setting up of workspaces and task planning on Microsoft Planner. • Programming of data collection tools (Excel, KoboCollect, SurveyCTO) and support to the implementation of the Third-Party Monitoring project (GH PEARL). • Preparation of proposals, finalisation of field-agent monitoring dashboards and drafting of technical proposals.	Inawa Institute

SELECTED PROJECTS: STUDIES AND SURVEYS

Dates	Projects / Programs	Institution s	Position s
Dec. 2024 – Feb. 2025	Global Health Program Evaluation, Analysis, Research and Learning (GH PEARL) • Preparation and translation of training materials; programming of data collection tools in XLSForm and	Inawa Institute for The Palladium	Research Assistant

Dates	Projects / Programs	Institutions	Positions
	- deployment on SurveyCTO. - Daily reporting, logistical support to the training of field agents, testing and correction of the tools. - Configuration of mobile devices, equipment management, finalisation of reports and tools. - Development of an Excel dashboard for the monitoring of 51 field agents.	Group / USAID	
8 – 17 Nov. 2024	Impact evaluation of the SME training and coaching program (SME Loop) Field data collection from small and medium-sized enterprises.	ASE / IERPE	Enumerator
Sep. – Oct. 2024	Benin Third Party Monitoring - Co-design Workshop Co-design workshop with implementing partners and USAID AORs.	Inawa Institute for The Palladium Group / USAID	Facilitator
Jul. – Sep. 2024	Does Parental Involvement Improve Student Performance? The Role of Information Asymmetry Entry of grades for Grade 8 and Grade 9 students in CEGs in the Atlantique department. Entry of financial data on school fees and correction of entry sheets.	CKDev – Centre Kemt pour le Développement	Data Entry Clerk
Nov. – Dec. 2023	Analysis of the explanatory factors of conflicts between herders and farmers in Benin - Programming of the questionnaire in Survey Solutions and participation in the training of field agents. - Verification and validation of collected data, initial quality controls and liaison with village chiefs and police commissioners. - Supervision of data collection from 440 respondents in the Kika arrondissement, Tchaourou commune, Borgou department.	ASE / IFM – IERPE	Field Supervisor

PUBLICATIONS AND TECHNICAL REPORTS

<i>Forthcoming (2026)</i>	Gender Inequalities in Bhutan using Civil Registration and Vital Statistics. Joint report by Development Expertise Lab and the National Statistics Bureau of Bhutan. Contribution to the data analysis and to the drafting of the report.
<i>Forthcoming (2026)</i>	Support for Community Protection Mechanisms and Civilian Resilience in the Benin-Togo Border Areas (SMCP-BT). Report by Development Expertise Lab for the Center for Civilians in Conflict (CIVIC). Contribution to the data management and the drafting of the report and presentation.

TEACHING AND CAPACITY BUILDING

Oct. 2025 – Jan. 2026	South Sudan Stata Training Design and development of Stata training materials: presentations, hands-on exercises, applied do-files, tests and assessments of participants. <i>Development Expertise Lab (DEL)</i>
Since Mar. 2023	Python Programming Trainer – AI Club CAEB, Porto-Novo Training of cohorts of about 25 participants over four months. Supports learners on basic and advanced applications of the Python language.
Aug. 2024 and Aug. 2025	Teaching Assistant – Stata Applications Support to first-year master's students on data cleaning and pre-processing. Hands-on applications: Logit, Probit, linear regression for binary variables, ANOVA, PCA and factor analysis. <i>African School of Economics (ASE)</i>
Jul. – Aug. 2022, 2023, 2024, 2025, 2026	Benin Excellence AI Summer School – Co-trainer and Project Supervisor Co-training of about 120 participants per year with a team of around 25 trainers. Supervision of hands-on sessions in Python programming and graphical statistics during the machine learning week. Direct supervision of student capstone projects, including: • 2023 – Optimal Antenna Positioning: Python algorithm that scans a map of Benin to identify the optimal antenna location maximizing network coverage, minimizing coverage gaps and reducing infrastructure costs. • 2024 – Automatic Traffic Counting: computer vision pipeline (Python, Google Colab, Roboflow annotation, data augmentation, YOLOv5) to detect and count zémidjans (motorcycle taxis) from road traffic videos. • 2024 – Blood Cell Counting: computer vision pipeline (Python, YOLOv8) on annotated and augmented medical imagery to classify red blood cells as healthy or abnormal. • 2025 – Electricity Consumption Prediction: time-series forecasting in Python on SBEE (Société Béninoise d'Énergie Électrique) consumption data, with seasonality-driven insights to support production planning and reduce power outages.
Oct. 2023 – Mar. 2024	Teaching Assistant – African School of Economics Python courses for second- and third-year undergraduate students. Teaching of R and Stata for first-year undergraduate students; design of quizzes and mid-term exams.

TRAININGS, WORKSHOPS AND CONFERENCES

Since Sept. 8, 2026	Designing and Running Randomized Evaluations – MITx / J-PAL MicroMasters Program.
Since Sept. 8, 2026	BREAD-IGC virtual PhD-level course on political economy 2026 – Bureau for Research and Economic Analysis of Development (BREAD) / International Growth Centre (IGC). Ongoing.
Oct. 2025	Mass mobilization and democratization – PRIO Research School on Peace and Conflict, Oslo, 29-31 October 2025.
Since Nov. 2024	Google Data Analytics: Professional Certificate – Coursera.
Mar. 2025	Introduction to Behavioral Science in Public Policy – IBRD, IDA, World Bank

	Group.
Nov. 2024	Manage Successful Field Research – World Bank DIME Group.
Sep. 2024	Work Smarter, Not Harder: Time Management – Coursera.
Nov. – Dec. 2023	Reproducible Research Fundamentals – World Bank DIME Group.
Jul. – Aug. 2021	Benin Excellence AI Summer School (Python, Machine Learning, Robotics) – Bénin Excellence NGO, Vallet Foundation, UNDP.

COMMUNICATION / PUBLIC PRESENTATION EXPERIENCE

Mar. 2026	Participation in the defense of the file submitted to INStaD for the granting of the statistical visa for the baseline study on the use of artificial intelligence by students.
Sep. – Oct. 2024	Facilitation of a co-design workshop with implementing partners and USAID AORs as part of the Benin Third Party Monitoring.
2022 – 2024	Co-facilitation of training sessions in Python, graphical statistics and machine learning as part of the Benin Excellence AI Summer School.

SCHOLARSHIPS

2019 – 2022	African School of Economics Excellence Scholarship.
2019 – 2020	Partial Scholarship from the Government of Benin.
2016 – 2022	Vallet Foundation Scholarship.

COMPUTER SKILLS

Statistics & data analysis	Python (Jupyter Notebook, pandas), STATA, R, EViews, QGIS, SQL, pivot tables.
Machine learning & computer vision	Python ML stack (YOLOv5, YOLOv8, Google Colab, Roboflow), time-series forecasting, data annotation and augmentation.
Data collection & surveys	Survey Solutions, KoboCollect, SurveyCTO, XLSForm, Google Forms, Microsoft Forms.
Dashboards & visualisation	R Shiny (dynamic real-time dashboards), Excel (field monitoring dashboards).
Generative AI & LLMs	Skilled use of Claude AI for analytical writing, literature reviews and optimization of research workflows; exposure to research projects based on LLMs.
Office & design	LaTeX, MS Office, Microsoft Planner, Microsoft Publisher (design of badges and visual materials).

CERTIFICATION

I sincerely certify the accuracy of all the information above.

Delphine Gbessouvègni HOUNYE
